1XXXXX   Explain the basics of the response phase within CDEM

Kaupae | Level	3
Whiwhinga | Credit	1
Whāinga | Purpose	This skill standard is designed for people involved in, or preparing to support, Civil Defence Emergency Management (CDEM) at the community, local, or national level. People credited with this skill standard can explain the structures, roles, and communication systems used in Civil Defence Emergency Management (CDEM) responses. They can describe key facilities, resource mobilisation, and the transition from response to recovery.

Hua o te ako me Paearu aromatawai \| Learning outcomes and assessment criteria

Hua o te ako | Learning outcomes	**Paearu aromatawai | Assessment criteria**	
1. Explain structures and roles within CDEM response.	a.	Describe key roles and responsibilities in an emergency response.
	b.	Identify the purpose of CIMS.
	c.	Describe CIMS structure and functions.
	d.	Describe how CIMS supports response.
2. Explain communication systems that support emergency response.	a.	Explain how information flows between the response and the community.
	b.	Identify the different communication systems used during an emergency response.
3. Describe emergency response operations	a.	Explain the role of the key facilities that can manage and coordinate a response.
	b.	Identify the basic steps involved in mobilising resources during an emergency response.
4. Explain the transition from emergency response to recovery.	c.	Explain how emergency response transitions into recovery and the implications for affected communities.

Pārongo aromatawai me te taumata paearu \| Assessment information and grade criteria

Ngā momo whiwhinga | *Grades available*

Achieved

Ihirangi waitohu | Indicative content

Response structures and roles within CDEM response.
- Introduction to response, basic roles, and structure.
- Key CDEM response roles and responsibilities (lead agency vs support agencies).
- CIMS purpose – groups/organisations who use it, when it is used.

Communication systems that support effective emergency response
- Importance of communication systems, and flow of information in coordinating emergency response activities.
- Overview of communication systems, including physical systems (radios, satellite phones), inter-agency communication systems, and public-facing systems like PIMS (Public Information Management Systems).

Emergency response operations
- Basic actions and facilities in emergency response
- Introduction to the facilities used in emergency response operations.
- Explanation of how these facilities manage resources and coordinate activities across different levels of response.
- Basic steps for mobilising resources during a response, including coordination with local, regional, and national entities.

Transition from emergency response to recovery
- Definition and role of recovery in emergency management.
- Understanding how the response phase transitions into recovery, and how this process supports community resilience and recovery efforts.
